#### **Foreword**

During the first quarter of 2020, Coronavirus pandemic hit different countries of the world including Palestine. The repercussions of the pandemic were starkly clear in the Old City of Hebron which depends on tourism in its trade and economic activity. Citizens stopped shopping as the government imposed lockdown and asked the citizens to stay at home to curb the spread of Coronavirus.

HRC made sufficient utilization of its resources to curb the spread of Coronavirus. It recurrently sanitized the houses, alleyways and market of the Old City as well as the Ibrahimi Holy Sanctuary. However, Israeli occupation impeded HRC's efforts in many neighborhoods of the Old City and used the spread of Coronavirus to control the Ibrahimi Sanctuary and large parts of the Old City.

Israeli occupation forces tightened their grip on the Old City by erecting military barricades and gates to restrict citizens' freedom of movement and travel or arrival at the Ibrahimi Mosque, using Coronavirus as an excuse. Accordingly, Israeli occupation authority unleashed Israeli settlers' assaults to take over Palestinian houses and properties, using different methods, including pillage, theft, destruction and fabrication of history.

Israeli settlers erected a rock statue, with Talmudic menorah engraved on it, at al Qazzazin Arcade at the popular Souq in the Old City of Hebron. To serve the same colonial purpose, they also built Cafeteria in front of the Ibrahimi Compound and other structures in the usurped house of al Zaa'tari family. They also added a floor to the courtyard of the Ibrahimi Compound.

The Israeli occupation government submitted to the demands of the Israeli settlers and agreed erecting a lift at the colonized part of the Ibrahimi Compound. Theis project was endorsed by the Israeli occupation government when Coronavirus pandemic was at its peak.

HRC challenged through its Legal Unit these violations, utilizing all legal means to defend the citizens of the Old City and their properties as well as the historical and religious character of their Old City.

Drawing on its faith in the necessity of exposing and documenting Israeli occupation colonial practices, the Legal Unit of HRC used to issue its annual report on Israeli violations in the Old City of Hebron.

General Director of HRC

#### Word of the Director General of HRC

The Citizens of the Old City of Hebron experienced hard times during the year 2020. The outbreak of Coronavirus pandemic and its impact on the tourism sector which constitutes the nerve of the Palestinian economy in the Old City was starkly clear. Commercial stores were closed, and so their owners lost their sources of earning. The workers and beneficiaries of the commercial sector as well as craftsmen were also adversely affected by the pandemic-induced conditions.

The closure of the Ibrahimi Mosque by the Israeli occupation authorities who used the pandemic as an excuse, was a hard hit to the tourism sector in the Old City. The worshipers weren t able to arrive at the mosque, and the situation went down, as a result.

Had these conditions not been imposed, the situation would have been much better.

At onset of the year 2020, Israeli occupation authorities took many decisions in favour of the Israeli colonial project and settlers—schemes in the Old City. These schemes weren—t reined in by the Pandemic. The Israeli occupation Minister of Army, Naftali Bennet, gave green light to Israeli settlers to build an elevator inside the Ibrahimi Mosque and construct a road in the garden of the Mosque that connects the cars park with the elevator location.

Israeli occupation government activities coordinator in the Palestinian territories ordered implementation of all steps related to land expropriation and withdrawal of administrative and legal powers of the Municipality of Hebron and Islamic Waqf Department.

The decision allows Israeli settlers to take over 333 dunums of land to implement the planned scheme.

The repercussions of this decision pose extreme danger to the current situation of the Old City of Hebron and the Holy Ibrahimi Sanctuary. The decision is aimed to change the Islamic landscape of the Old City, wipe off its historical, cultural and architectural features and Judaize the Ibrahimi Holy Sanctuary and turn it into a Jewish synagogue.

The Old City was also exposed to large-scale assaults by the Jewish settlers, including an assault on Al Zatari Family House by carrying out underneath excavations and other works inside. The Israeli settlers also changes the character of the Istiraha Building by building a third floor (Cafeteria) on its roof, just opposite to the white stairs in the usurped part of the Holy Sanctuary.

Illegal and inhumane Israeli occupation practices pose clear danger to citizens—lives and to their properties. It is a blatant assault on UNESCO which considered Hebron and the Ibrahimi Holy Sanctuary as part of the World Heritage.

For the purpose of minimizing Israeli colonial expansion in the Old City of Hebron, HRC and its Legal Unit are exerting all efforts to thwart Israeli occupation decisions and stop settlers—continued violations of human rights. It tries to achieve that by addressing all judicial bodies. It also asks the international community and human rights organizations to take practical steps to curb the Israeli colonial enterprise in the City of Hebron.

**Emad Hamdan**Director General of HRC

#### Introduction

HRC established its Legal Unit to follow up and document the violations and crimes which the Israeli occupation government commits against the Palestinian citizens of the Old City of Hebron and their private property, defend their rights, raise their awareness of their rights, challenge Israeli military decisions through legal means, represent Palestinian victims in Israeli courts, expose Israeli government and settlers' crimes against the Palestinian citizens through media outlets and human rights and international organizations, expose Israeli occupation colonial plans and follow them up with local and international organizations, including United Nations Rapporteurs and High Commissioners of Human Rights as well as the United Nations Human Rights Council.

# Legal Unit Manager's Word

Israel's occupation ongoing closure of the Old City since 20 years is coupled with more suppressive and repressive measures. Israeli occupation army and settlers' violations increased in the year of 2020, making use of the spread of Covid19- that preoccupied the whole world. In light of Covid-19-induced conditions, the burden of the Legal Unit in confronting Israeli occupation violations increased.

It faced growing challenges with regard to taking legal measures to press Israel to stop its violations. The main challenge rests with the urgent primary legal measures as Israeli occupation executive departments used to procrastinate handling of such violations committed by the Israeli settlers against the Palestinian citizens. Such policy of procrastination led created a fait accompli.

During the year of 2020, Israeli occupation authorities issued a number of new military orders and extended others under security pretexts to provide services for Israeli settlers and cement their presence in the Old City. These orders paved the way for tightening the military closure of the Old City and stripped the Waqf Directorate and Hebron Municipality of their legal and administrative powers there to strengthen Israeli occupation control over the Ibrahimi Compound and its courtyards with a view to turn it into a Jewish Synagogue. Such trend pushed HRC to take a number of legal measures through its Legal Unit to stop Israeli settlers' acquisition of the area.

Despite all the challenges facing the Legal Unit, it continues its effort to face Israeli occupation army and settlers' violations through legal means, including submission of complaints and petitions. It also documents violations and assaults, committed by the occupation army and settlers, in accordance with international standards. It provides its documents data for legal and human rights local and international organizations to update them on the Palestinian situation in the Old City of Hebron and expose Israeli occupation violations. It submitted complaints to United Nations Special Rapporteurs and UNESCO to stop Israeli occupation violations which are paramount to crimes against humanity. Furthermore, the Legal Unit started preparing a complaints file to be submitted to ICC.

In close, I extend my thanks to the Staff of the Legal Unit who stand behind its success.

Legal Unit Manager Legal Advisor **Tawfeeg Jahshin** 

## **Legal Unit Achievements 2020**

1. Issuing and obtaining a precautionary order from the Supreme Court and the Central Court regarding the implementation of works under the construction permit on the land of the Old Busses Station.

By taking the necessary legal measures, the Legal Unit was able to stop the construction of colonial housing units for settlers on the land of the Old Busses Station. It submitted a petition to the Israeli Supreme Court, which in turn issued a precautionary order to stop the implementation of the construction work.

It referred the case to the Central Court, which also upheld the previous decision. The precautionary order, which stipulates stopping construction on the land of the old bus station, is considered an achievement. It delayed the occupying power decision to construct over the Palestinian citizens' land.

The Israeli occupation government allocated an amount of 22 million dollars to build 31 housing units on the land of the Old Busses Station, approved by the Israeli Higher Planning Council, knowing that the area has been closed by Israeli military orders since the eighties.

#### 2. Removing Talmudic MenorahErected by Israeli Settlers on the Roof of the Ibrahimi Compound:

On February 2020, 23, the Legal Unit addressed the official Israeli occupation authorities through coordination with the Palestinian civil liaison. It succeeded in removing the candlestick placed above the Ibrahimi Mosque. Its installation there represented a violation of the sanctity of the place, a change of identity and a falsification of history, as the Ibrahimi Mosque is a two thousand years old Palestinian historical heritage and an Islamic mosque.

#### 4. Removing a concrete room from the land of Aref and Abdel Moneim Jaber

By adhering to legal measures and filing complaints with the competent judicial authorities, HRC succeeded in removing a building erected by Israeli settlers on the land of Aref and Abdel Moneim Jaber in the Baqa'a area.

#### 5. Suspense of building a lift by Israeli settlers in the Ibrahimi Compound

HRC was able, through legal procedures before the competent judicial authorities, to obtain an order to freeze the establishment of a lift for settlers' families in the Ibrahimi Mosque. Litigation proceedings are still ongoing. .

#### 7. Evacuating Israeli settlers from the house of Abdel Muti Abu Sneina on Al Shuhada Street

On August 2020, 29, the Legal Unit revealed a violation of the house of citizen Abdul Muti Abu Sneina, located in Al-Shuhada Street, knowing that the house was deserted due to the Israeli military orders imposed on the area. These military orders which have been imposed since 20 years affect all the houses and shops in Al-Shuhada Street and Al-Hisbah area. Based on the follow-ups of the legal unit, the situation in the aforementioned house was restored, and the door of the house was locked to prohibit Israeli settlers from raiding it again.

#### 8. Addressing UNESCO concerning Israeli occupation army and settlers assaults on the Ibrahimi Compound:

UNESCO has been addressed several times about the assaults committed by the occupation army and its settlers on the Ibrahimi Mosque, the last of which was about preventing the workers of HRC from restoring and preserving the Holy Compound, knowing that it was registered on the UNESCO World Heritage List of Heritage.

#### 9. Submission of Complaints to UN Special Rapporteurs

The Legal Unit of HRC submitted several urgent complaints to the United Nations special rapporteurs, the most important of which was a complaint regarding the prevention of restoration in the Old City and the Ibrahimi Mosque.

The Legal Unit wrote to «UNESCO» regarding the prevention of the restoration of the Ibrahimi Mosque and the placing of a rock menorah at the Souq.

#### 8. Assisting in Releasing Detainees of the Old City

During the year 2020, the Legal Unit documented (30) cases of arrest of citizens of the Old City. The Legal Unit succeeded in following up (13) of them secured the detainees' release. The remaining cases were referred to the competent Palestinian official and civil authorities or were released after interrogation.

#### 9. Maintenance of Citizens' Houses Damaged by Israeli Occupation Forces

Fulfilling its tasks of restoring houses in the Old City, HRC repaired the damage caused to the doors of many houses that were broken into by the occupation soldiers. It gave them priority as emergency cases in order to support and secure the families inhabiting them and protect and preserve these heritage houses against the attacks of settlers' assaults.

# **Legal Unit Achievements 2020**

The Legal Unit of HRC received students (graduates) from the legal clinic of Hebron University. The students listened to a lecture on Israeli occupation violations in the old city of Hebron and the legal follow-up mechanism of these violations.

Monthly meetings with human rights organizations for discussion of the most outstanding matters related to the Old City of Hebron.

A meeting via the zoom app was held with human rights organizations to discuss several important matters related to the Old City of Hebron

Meeting with international and local institutions to discuss violations of religious and educational rights and attacks on archaeological sites

Making field visits to victims of violations in order to provide them with legal and morale support.

Results of monitoring and documentation of Israeli occupation human rights violations carried out by the Legal Unit:

The total number of violations committed by the Israeli occupation army and settlers against Palestinian citizens and their property in the Old City during the year 2020 reached (610) incidents of human rights violations. Most of them were committed against Palestinian citizens and their property near Israeli colonial settlement outposts.

## **Legal Unit Achievements 2020**

Israeli occupation authorities carry out systemic measures against the Palestinian citizens of the Old City of Hebron, especially those who live close to Israeli colonial settlements to expel them from their houses. Their properties are subjected to robbery and destruction, especially those located in the military-closed zone where no Palestinian is allowed to access.

The staff of Hebron Rehabilitation Committee (HRC) which seeks to rehabilitate the stores, houses, architectural and cultural centers of the Old City were denied access.

During the year 2020, the spread of Covid19- pandemic disrupted citizens and institutions' everyday life activities and impeded the process of monitoring and documentation of the Israeli occupation violations against the citizens and their private and public properties.

Despite these impediments, we documented (368) incidents of violations committed against the Palestinian citizens and their private and public properties. Each incident has a number of violations that are different from one another in terms of type and target. 610 violations of human rights were committed against citizens and property.

The reports show that most of human rights violations which were committed during the year 2020 were committed by the Israeli occupation army and some by the Israeli settlers.

The below statistical charts show the number of violations documented by the Legal Unit of HRC:

Chart (1) shows that some violations were committed by Israeli settlers accompanied by Israeli soldiers

The total number of assaults committed by Israeli soldiers during the year 2020, is (336) violations, representing %55 of the total violations.

The total violations committed by Israeli settlers against Palestinian citizens and their property during the same period amounted to (226) violations, representing %37 of the total violations.

The total violations committed by the occupation army and the settlers jointly amounted to (47) incidents of violation, representing %8 of the total violations.

Chart (2): Percentage of assaults distributed over the perpetrating agency during the year 2020.

These data indicate that the occupation army has the largest share in the assaults on Palestinian citizens and their property using false pretexts. The occupation soldiers also provide protection for the Israeli settlers who assault Palestinian citizens.

# Distribution of violations by targeted group during 2020:

The Israeli violations of Palestinian human rights in the Old City and assaults on property, such as markets, shops, homes, religious places, and historical monuments, are in violation of all international laws and norms. They aim to liquidate the Palestinian presence and obliterate the identity of the place, imposing closure on the area and prohibiting citizens from entering it, depriving them of access to their homes or shops.

They forbid them to exercise their right to worship inside the Ibrahimi Mosque. They assault Palestinian homes by looting and vandalism. They take all measures to force Palestinian citizens to abandon their homes to move settlers there to realize demographic change in the area.

Israeli violations are categorized by targeted group as follows:

- **Violations against the population:** These include assault s against individuals (men, women, and children) or against groups of individuals. The total of these assault s amounted to 245 incidents of violations, including 73 violations against individuals.
- **Violations against private property:** such as shops, homes, and land owned by individuals... The total of these violations is 124.
- **Violations against public property**: such as streets, roads, public squares, schools, and religious places... as a total of 241 violations.

The following table shows the graphic representation of the violations, broken down by the target group:

#### 1. Israeli Assaults on Citizens:

The assaults perpetrated against Palestinian citizens in the Old City either affect individuals - we classify them as individual violations - such as cases of arrest, physical assault, obstruction of passage through checkpoints or shooting ... and others that affect groups of citizens - we classify as collective violations - such as cases of targeting students Schools or people with tear gas and bullets, or obstructing their passage or preventing them from reaching a specific place, such as praying in the Ibrahimi Mosque or obstructing shopping, using false excuses.

The groups of citizens who are subject to violations include children, especially school students.

It is important to note that due to the difficult circumstances surrounding documentation during the months of the year 2020, not all those affected were reached and accurately counted.

# The assaults of the occupation army and settlers on the targeted population groups - individual cases - (children, women, men) during the year 2020 can be explained as follows:

• Assaults on children: the occupation targets children in its assault s on the population. The assault s of the occupation soldiers and settlers directly affected 19 children, constituting %26 of the total number of individuals who were assaulted.

#### **Assaults on women:**

. Palestinian women play significant role in all walks of life. Women who under occupation face several challenges, and they deserve to be uplifted. Neither international laws nor humanitarian norms have prevented the occupation army and its settlers from carrying out crimes against the Palestinian people, including women, children, and men. Palestinian women were often targeted and victimized by Israeli occupation army and settlers.

Palestinian women living in the old city of Hebron face difficulties and burdens of daily life. Their suffering is compounded as a result of the practices of the occupation army and its settlers, which include obstruction of movement due to strict closure policies, checkpoints, and humiliating inspection. They are subjected to such conditions and in several times pregnant women put their newborns on checkpoints as they were denied access to medical centers.

In many cases, pregnant women aborted due to the direct physical assault they were subjected to by settlers or because of tear gas canisters fired by the occupation army in the area. Such situation affects the psychological and reproductive health of women and the safety of the newborn. Many Palestinian women were subjected to serious assaults, including firing, arrest, or beating.

The year 2020 wasn't different from the years before as %10 of the people who were subjected to Israeli violations were women. Women constituted %13 of the total percentage of the people who were detained by the Israeli occupation during the year 2020.

• Assaults on men: the assault s of the occupation soldiers and settlers affected 47 men, or %64 of the total number of individuals who were assaulted.

Chart (4): The figure shows the size and percentage of assaults on population groups during the year 2020.

# **Martyrs:**

One of the most serious patterns of violence Israeli forces used against the Palestinians was the policy of shoot – to – kill.

-17year-old boy, Muhammad Salman Tohma Al-Haddad, was shot in the chest near the Al-Shuhada Street checkpoint - Bab Al-Zawiya.

The Palestinian Ministry of Health confirmed that the boy succumbed to his injury by a bullet that pierced his heart.

# **Detention of Palestinian Citizens in the Old City:**

#### · Legal follow-up of detention cases:

During the months of the year 2020, the legal unit documented (30) cases of arrest among citizens. The Legal Unit succeeded in following up (13) cases of them until the detainees were released, and the remaining cases were referred to the competent Palestinian official and civil authorities or were released after investigation.

16 men detained

10 children were detained

4 women were detained

The following table shows the number and percentage of detainees from each category of the population.

Chart (5): The percentage of detention of citizens, distributed by population groups during the year 2020.

# 1. Assaults on Private Property:

By means of intimidation, sabotage and assault, looting and pillaging, the Israeli settlers carry out their systematic attacks on the private properties of Palestinian citizens, such as homes, lands, cars, shops, and others, with the aim of intimidating the citizens, making them feel unsafe for their lives or money. Such assaults also aim to push Palestinian citizens to abandon the Old City.

During the year 2020, the incidents of violations against citizens' private property amounted to a total of (124) violations, the most serious of which were:

- Attacking citizens' homes, smashing their doors, and assaulting their children. The houses of Naseem Badr, Muhammad Sadiq Aknibi and Nader Idris were attacked on 2020/2/6.
  - Night raids by the occupation army of citizens' houses and repeatedly terrorizing the population.
  - Imposing a siege on many houses and obstructing their residents from accessing them.
  - Obstructing the restoration work carried out by HRC in the houses of citizens.
- Attacking the Gold Market shops by extending a sewage network related to the adjacent settlement outpost, and transforming the market into health-hazard.
- Razing agricultural lands belonging to citizens in the old city and located near the settlement of Kiryat Arba in the Baqaa and Jabal Jalis area.
- Encroachment on the land of the citizen Aref Jaber in the area adjacent to the Kiryat Arba settlement, by establishing a settlement room to serve as a settlement outpost.
  - Attacking citizens' cars and smashing their windows.
- Settlers attacked citizens' homes with stones and empty bottles in Jaber and Al-Salaimeh neighborhoods, Al-Shuhada Street and Tel Rumeida during provocative marches on Jewish holidays and other various occasions.
- Working on building a summer residence over the house of the Abu Rajab family, which was usurped several years ago?
- Executing extensive restoration works in the Zaatari building, which was usurped several years ago?

# 2. Assaults on Public Properties:

These assaults target religious places, streets, public squares, schools, kindergartens, and the assets of Hebron Municipality's and the Awqaf Directorate, and others...

Occupation army and settlers' assaults on public properties in the Old City during the year 2020 amounted to (241) violations, distributed as follows:

- Fifteen (15) assaults on schools, which constitute %6 of the total assaults against public property.
- •(132) attacks on the streets and public squares, representing %55 of the total attacks against public property.
- (94) attacks on religious places c, representing %39 of total attacks against public property.

Chart (6): Shows the size and percentage of attacks by the occupation army and settlers on public property during the year 2020

# Most serious assaults on public property:

• Setting up tents in the Ibrahimi stadium, gardens and courtyards of the Ibrahimi Mosque, and holding Talmudic rituals and celebrations of various natures.

Tours of settlers guarded by the occupation army in the markets of the old city.
The occupation army stormed primary schools, fired tear gas at students, beat them and arrested them.
Obstructing the passage of the teaching staff and students in Cordoba Basic School on Al-Shuhada Street and putting a fence to isolate it from Al-Shuhada Street.

• In an apparent move to fabricate history; On June 2020,17, the settlers installed a stone engraved with the Talmudic symbol "The Candlestick" on the archway of Souq al-Qazzazin.

The settlers started adding a floor in the Ibrahimi Mosque Square.
Erecting caravans for settlement purposes in separate areas of the Old City including in the Ibrahimi Stadium, in front of the Ibrahimi Mosque, inside the old Hisba - to be used as hospitality units, each of which can accommodate eight families

A huge candlestick was erected on the Ibrahimi Mosque.

• The occupation soldiers stormed the old Hebron municipality building several times.

 Removal of military caravans from the Al-Karajat area (the old bus station) in order to carry out excavation works that serve the settlement objectives.

Celebrations and religious rituals and lighting a menorah in the Kasbah market in the old city.
Chopping trees in the gardens of the Ibrahimi Mosque.
Closure of the streets of Jaber neighborhood with cement blocks.

• Military orders to seize lands around the Ibrahimi Mosque to implement projects serving settlers.

#### **Building 31 colonial housing units on the Busses Garage Land:**

In continuation of the settlement expansion in the old city of Hebron, the political level of the occupation state announced in late 2017 that it intends to approve the construction of thirty-one settlement housing units on the land of the old central bus station. The Israeli Ministry of Army together with colonial settlement associations, including so-called the Association of Renovators, the Minister of War and Civil Administration, the Antiquities Authority, and other colonial settlement institutions provided license for such colonial project.

This order was issued to promote the project that began in 1983, when the occupying power issued military orders to occupy the old bus station, expel its owners, including Hebron Municipality and and Waqf Tamim Al-Dari and the National Bus Company. These orders were all under false allegations and security pretexts.

The case was filed with Israeli courts and a decision was issued by the Israeli Supreme Court stating that when the security need is ended, the situation will be restored to what it was before.

However in the year 1991, the occupying power turned over the Supreme Court's decision and allowed the

However, in the year 1991, the occupying power turned over the Supreme Court's decision and allowed the construction of caravans for settlers in the station. A petition was submitted in 2008 against the establishment of this colonial outpost, but the petition was rejected and nothing changed until the occupation government submitted an application for a permit in the year 2017.

application for a permit in the year 2017.

In the same year, the occupying power decided to construct 31 housing units, and so moved the caravans to the eastern section of the garage for two purposes. The first is to build a settlement outpost on the western side adjacent to the settlement of Osama Bin Al Munqith School, which is called in Hebrew (Beit Romano) and the second purpose is to establish a huge camp and a huge infrastructure under security pretexts in preparation for building a colonial settlement. This prompted HRC to confront this settlement plan by submitting several petitions to the Central High Court. And we obtained a precautionary order banning construction in the western section of the station until 2021/7/7. As for the eastern section, the Israeli army continues to build a huge camp, as mentioned previously, with the complicity of the Supreme Court that rejected the petition and the precautionary order that was presented by the Palestinian side to stop the occupation army colonial project in the area. The court rejected all applications submitted by the Palestinian side thereto. The case was postponed to until 2021/7/27 in order to give the army an opportunity to complete the camp before the court's hearin

# **Ibrahimi Holy Compound**

The Ibrahimi Mosque is exposed, on a daily basis; to numerous violations represented in the inhumane practices of the occupation soldiers who are present at the checkpoints and gates set up to restrict worshipers and visitors access.

It is also subjected to multiple incursions by settlers, who offer to hold various celebrations in its internal halls and external yards.

The Prime Minister of the occupying state and a number of his ministers, including the Minister of Religions Affairs, desecrated the Ibrahimi Mosque several times during the year 2020.

The visit was aimed at winning the votes of settlers as he promised to hand over the Ibrahimi Mosque to them. In addition, the year 2020 witnessed a Judaizing process against the Ibrahimi Mosque in a move aimed at confiscating it and turning it into a synagogue and annexing it to the so-called "Jewish heritage List."

The Israeli right-wing parties made promises to judaize the Ibrahimi Mosque to win settlers' votes. Accordingly, the Israeli occupation government turned a blind eye to settlers' construction of a «cafeteria» in front of the white staircase ascending to the usurped section of the al Haram al Shareef in accordance with "Shamgar» committee division of the mosque.

The Israeli occupation government began preparing plans, monitoring budgets and giving orders to the so-called Ministry of Security to put its hand on the Ibrahimi Mosque and its courtyards, in order to implement architectural additions there, most notably the construction of an elevator, using flimsy pretexts that encapsulate its colonial intention with a human nature to gain the sympathy of public opinion.

# Assaults carried out against the Ibrahimi Mosque include:

- Allocating a part inside the mosque for the operations of circumcision of settlers' children.
- Erecting the Talmudic symbol "the menorah" on the roof of the Ibrahimi Mosque, raising the Zionist flags on its facades, building tents, and holding noisy celebrations of varied nature in its squares and within its sections.
- The occupation authorities exploited the "Corona" pandemic to implement their settlement plans, as they prevented Palestinian citizens from entering to pray inside the Ibrahimi Mosque several times and did not allow worshipers to exceed the number of thirty, while allowing settlers on many religious and social occasions to enter the mosque and perform their rituals, as well as to hold their noisy parties in the courtyards and gardens of the Haram.
- Closing the Ibrahimi Mosque in the face of Muslim worshipers on Jewish holidays using Corona pandemic as an excuse.

The occupation authorities prevented the call to prayer from the minarets of the Ibrahimi Mosque 599 times during the months of the year 2020.

The attached chart shows the number of times it was forbidden to raise the call to prayer during the mentioned period:

A chart showing the number of times the call to prayer was prohibited in the Ibrahimi Mosque for months of the year 2020

## Coronavirus Pandemic Impact on the Old City of Hebron

Coronavirus pandemic has severe impacts on the different walks of life of the Palestinian people, particularly in the Old City of Hebron since it is subjected to Israeli occupation army control and settlers domination. Its economy has been deteriorating since 20 years.

#### **Coronavirus Impacts:**

#### **Health Impact:**

The citizens of the Old City weren't having access to the health preventive measures set by the Palestinian Ministry of Health due to the restrictions imposed by the Israeli occupation authorities and their arbitrary policy which objects to any health measures set by the Palestinian government and the Palestinian grass root organizations. The Israeli occupation authorities argue that such measures can't be applied without liaison and permission in advance. It is important to remind that the Old City has been closed to the Palestinian paramedic service for 20 years. Had any Palestinian ambulance entered it, it would have been assaulted by Israeli settlers.

The residents of the Old City who suffer from chronic disease, including diabetes and blood hypertension have no access to medicines because of Israeli occupation closure of the Old City. Their suffering aggravated at the first months of the spread of Covid19- pandemic.

The City of Hebron suffers from water shortage as water isn't regularly pumped into the city's neighborhoods. So, the residents of the Old City suffer shortage in drinkable and house-hold-use water. They can't solve this problem by buying water tankers as Israeli occupation forces don't allow their entry into the Old City.

The water tanks which are installed on the roofs of the residents' houses are unusable as they are damaged by Israeli settlers. They have polluted some of them with chemical materials to prevent the Palestinian residents from using them.

#### **Economic Impact**

The Economy of the Old City depends on trade and labour. The markets of the Old City were recovering from the Israeli restrictive measures before the spread of Covid19-.

After HRC set ambitious plans to operate stores and rehabilitate citizens' houses, historical and religious sites as well as the infrastructure of the Old City. These plans encouraged shopping and tourism as well as recovery from economic recess.

Economic recovery hasn't lasted long as tourism, shopping, crafts workshops, glass and pottery factories deteriorated and Israeli occupation authorities exploited the pandemic and prohibited worshippers from arriving at the Ibrahimi Mosque. These restrictions paralyzed the markets of the Old City.

The lockdown measures imposed due to Covid19- pandemic caused factories and workshops to suspend their work and lay off their workers, increasing the rate of unemployment.

When the people and institutions decided to return to work and coexist with Covid19- pandemic, trade activity in the Old City remained weak because of the absence of local and international tourism which is one of the key pillars of its economy.

#### **Education Impact:**

The students of the Old City face different patterns of Israeli violations, including search and frisk while going to their schools and returning home. Some of they are subjected to punching and detention in clear violation of their right to education.

While schools were closed due to the spread of the pandemic, the students and their families faced several problems as on-line education wasn't easy for many of them. It was difficult for their families to provide laptops for them and some families weren't having access to internet services.

To improve the educational situation of the students of the Old City and alleviate their suffering, certain facilities must be provided for them in line with the new situation reflected by the pandemic.

#### **Environmental Impact:**

Public, physical and mental health was significantly affected by environmental factors. Environmental pollution impacts human health and contributes to diseases spread. It affects mental health and causes depression, tension and anxiety.

The buildings the Old City of Hebron have humidity due to environmental reasons. Most of them were built by clay, and so the keep moisture in winter.

The natural air that blows into houses is crucial for removing humidity and creating healthy environment that reduces diseases. Clean water and appropriate sewage system contributes to improving public health and preventing diseases spread.

Some neighborhoods in the Old City also suffer from the phenomenon of raising animals or poultry in homes or basements (which are warehouses built under buildings that have no windows and are poorly ventilated), which leads to direct and dangerous air pollution

Despite the impacts of the Coronavirus pandemic that overshadowed the area, HRC did not abandon its responsibilities towards the Old City and its citizens.

Despite part-time job, and lack of resources, it continued to work on the following:

- 1. Sterilization of the markets and alleys of the Old City, shops and official institutions and tourist facilities therein.
- 2. Providing coronavirus samples examining kits, funded by the German government, and handing it over to the Health Directorate.
- 3. Distributing 800 food parcels to residents of the Old City and closed areas, as the majority of the target group was from the working class who depend on daily income, and they were affected by the repercussions of the pandemic.
- 4. HRC placed its restored hotel at the disposal of the Ministry of Health and the Hebron Governorate to accommodate Covid19- infected cases.
- 5. Carrying out some emergency repairs and restoration works in public buildings such as the schools of the Old City, especially the Ibrahimi School, Al-Fayhaa and the Hebron Museum.
  - 6. Continuing to monitor and follow up Israeli violations with the concerned authorities.
- 7. Issuing several reports to official bodies and international organizations to inform them of the status quo in the Old City and their compounded suffering under occupation in light of the Corona crisis.
- 8. Distributing cultural and health awareness brochures on the mechanism of preventing the spread of this Coronavirus and the mechanism of dealing with it.
- 9. Contributing to organizing some recreational activities for the residents of the Old City in order to alleviate their psychological pressures and emergency maintenance work in some homes.

# 1. Monthly Violations Table (January 2020):
